

Instruction Manual

Please read this instruction manual carefully before using the product and keep it properly

Let Nature Back Indoors

Specifications

Net weight (Kg)	11
Gross weight (Kg)	13.5
Dimensions HxWxD (mm)	310 x 310 x 761.5

ELECTRICAL CHARACTERISTICS

1> Power supply requirements: 100~120Vac/50~60Hz or 220~240Vac/50~60Hz

2> Power consumption:

Mode	Power (W)
Night mode:	3
Speed 1	7
Speed 2	15
Speed 3	27
Speed 4	50

PERFORMANCE

1> Clean Air Delivery Rate*

Mode	CADR (m ³ /h)	CADR (CFM)
Night mode:	100	58
Speed 1	200	117
Speed 2	360	210
Speed 3	475	277
Speed 4	610	356

*+-10% of specified air delivery

2> Noise Level*

Mode	Noise Level (dB)
Night mode:	<30
Speed 1	31.5
Speed 2	37.5
Speed 3	45
Speed 4	52

*Noise level tested with ambient noise=30dB

3> Motor Fan type: BLDC

4> PM2.5 sensor Type: Laser

CONTROL PANEL FEATURES

Intelligent Filter & Biotic Life Monitor: **Yes**

Timer: **1~12H**

Auto Mode: **Yes**

Child Lock: **Yes**

Speeds: **1,2,3 and 4**

Sleep Mode: **Yes**

ENVIRONMENT (Operating conditions)

Operation temperature: -20°C to 45°C

Humidity 10% to 95% RH

FILTER CONFIGURATION

Certified Filtration Efficiency

Up to 99.97% for particles ≥ 0.3 microns (um)

Bacteria Filtration Efficiency

99.997%

Filter Grade

H13 high efficiency filter, H14 is an option

Average Filter Life

10~13 Months

Security Information

⚠ Personal injury or property damage may be caused if the product is not used in accordance with the regulations. Please read the following carefully to prevent dangerous operation.

Machine placement:

- Before using the product, it should be placed on a dry, stable and stable floor, leaving at least 30 cm of space around the product.
- Do not place near curtains.
- Do not place in direct sunlight.
- Do not use this product in humid or high temperature environments such as bathrooms, toilets and kitchens.
- Do not immerse the product in water.

Power related

- This product is limited to use with 220~240Vac/50~60Hz or 100~120Vac/50~60Hz power supply.
- If the power cord is damaged, stop using it immediately and contact the service center.
- Do not pull the power cord to move the product.
- Do not touch the power plug with wet hands.
- If there is dust or water stains on the power plug, please wipe it with a dry towel.
- Please unplug the power plug when not in use for a long time.

User related:

- Do not spray flammable substances near this product.
 - Do not place anything on top of the product and do not sit or stand on the product.
 - Do not spray water directly on the product or use chemical cleaners such as alcohol, hydrochloric acid, etc. to clean the product.
 - When the product is abnormal, please unplug the power plug immediately and contact the maintenance center in time.
 - Do not block the air inlet and outlet of this product with any objects.
 - Do not block the detection hole of the air sensor.
- Be sure to stick your fingers or other objects into the air inlet or outlet.
- Please take good care of children and ensure that children do not play with this product to avoid accidents.
 - Alcohol, perfume, and cleaning agents may affect the air detection of this product, so please do not use them at the same time.
 - This product cannot replace natural ventilation or other electrical appliances such as vacuum cleaners, range hoods, etc.

Filter Replacement and Maintenance

Warning: CUT OFF THE POWER BEFORE REPLACING THE FILTER

When replacing the filter, only the original filter provided by our company can be used, and do not use other filters from other brands, otherwise, it may cause the performance of the product to decline or even damage the product.

Do not disassemble, repair or modify the product arbitrarily.

PM2.5 dust sensor replacement

When the PM2.5 dust sensor reaches its service life and the displayed value is inaccurate, only the original model PM2.5 laser sensor provided by our company can be selected. (Otherwise it may lead to product performance degradation or even product damage).

Operation of the BA-2080

1. Product buttons and interface:

1> Function key description

2> Display & Indicator description

2. Power on the unit

After plugging in the power supply cable, the machine beeps once, all the indicators on the front panel flash once, the backlight of the power button is on, and all other indicators are off, the machine is in the standby state;

3. Power button
